Musculoskeletal ultrasound is performed by an ultrasound technologist or technician. A diagnostic radiologist or radiologist is a medical professional who is trained to interpret ultrasound images. They specialize in interpreting medical imaging tests including MRI scans, ultrasound, and CT scans.

Musculoskeletal Ultrasound: Purpose, Benefit and Procedure

The appearance of musculoskeletal anatomy on ultrasound is fortunately usually intuitive. Nonetheless, some points should be made and the sonographer should concentrate on pattern recognition of normal structures so that, even in the absence of a clear diagnosis, abnormal versus normal may be distinguished.

Musculoskeletal Ultrasound - Overview - ACEP

Musculoskeletal ultrasound examination is usually completed within 15 to 30 minutes but may occasionally take longer. When the exam is complete, you may be asked to dress and wait while the ultrasound images are reviewed. After an ultrasound examination, you should be able to resume your normal activities immediately. ...

...

Musculoskeletal (MSK) ultrasound performed by non-medical practitioners is a developing practice. The aim of this paper is: (1) to audit an experienced sonographer's (SJR) performance after one year's independent reporting against two experienced MSK radiologists (CJG, MC); and (2) to establish an audit standard against which such role development might be contrived.
