With a conventional gasoline engine, the intake air volume is controlled by a throttle valve, increasing the air intake resistance when a piston descends. The all-new MIVEC engine restrains this air intake resistance by controlling the intake valve lift as well as the valve opening/closing timing simultaneously and continuously.

The Lancer which comes with the 4A91 engine weigh 1750kg (gross weight) and according to this the Xpander weighs 1780kg. (IDK how they calculate the gross weight. Couldn't find the curb weight of the Xpander, curb weight of the Lancer is 1240kg) Lancer does around 12 under mixed conditions, I don't think the xpander would do any better (Edit: Unless it has fuel saving tech like idle stop start)
