All About Gout Uk Gout

Gout is a type of arthritis. It is caused by having too much of the chemical, uric acid, in your bloodstream. Uric acid is the waste product created when the body breaks down purines (a type of protein found in many foods and all of your cells). Increased levels of uric acid in your blood may occur if, for example, your kidneys cannot efficiently remove it, you have a rare genetic abnormality, or because your diet and lifestyle increase the amount of uric acid that you produce.
