IN ACTION - pepa.holla.cz

AngularJS in Action teaches you everything you need to get started with AngularJS. As you read, you'll learn to build interactive single-page web interfaces, apply emerging patterns like MVVM and tackle key tasks like communicating with back-end servers.

Angularjs in Action - Wiley India

form action with javascript. Ask Question Asked 8 years ago. Active 1 month ago. Viewed 192k times 30. 9. I have a form that must execute a javascript function on submit, the function then posts data to my php send mail file and the mail is sent. But it only works in fire fox.

form action with javascript - Stack Overflow

Instead some javascript logic should be triggered to handle the form submission in an application-specific way. For this reason, AngularJS prevents the default action (form submission to the server) unless the `<form>` element has an action attribute specified.

example-ng-form - AngularJS

AngularJS starts automatically when the web page has loaded. The `ng-app` directive tells AngularJS that the `<div>` element is the "owner" of an AngularJS application. The `ng-model` directive binds the value of the input field to the application variable name. The `ng-bind` directive binds the content of the `<p>` element to the application variable name.

Introduction to AngularJS - W3Schools

To return the Person data as JSON, let us go ahead and add an action in the controller with the return type JsonResult. Keep in mind that you can easily write a Web API to return JSON data; however the purpose of this post is to show you how to work with AngularJS, so I'll stick with the simplest option, which is creating an action which returns JSON data:

How to use AngularJS in ASP.NET MVC and Entity Framework ...

We have already explained, how to change form action dynamically using jQuery. Here, we are doing same, but using JavaScript. Below example consists of an HTML form with a select option field, as user selects an option, form action gets dynamically set to respective page using `.action ()` method of JavaScript.
