Gradient on other types of isoline maps can be interpreted similarly. A high pressure gradient on an isobar map indicates a high pressure gradient force and strong winds, while a low pressure gradient suggests light winds. Profile refers to a cross-section, or horizontal view, of some part of the isoline map.

LAB 3 ANSWER SHEET Exercise 6:

## Download File PDF Answers Isoline Lab Geography

Isolines Part I: For points not ON an isotherm, you should estimate; some of your estimates may be a degree or two different from the ones provided here, which is okay. At the same time, if a point was not ON an isotherm, you should know that its temperature value is not the value of one of the isotherms. Also, your answers should be in C or F;
