Spinal Osteoarthritis (Degenerative Arthritis of the Spine)

Spinal arthritis causes stiffness and low back pain. The stiffness is worst upon waking up in the morning, tends to ease with activity, then worsens toward the end of the day. Presumably, this is because fluid has built up in the joint due to inactivity overnight, which causes more swelling.

Symptoms of Arthritis of the Spine

Osteoarthritis is the most common form of arthritis, affecting millions of people worldwide. It occurs when the protective cartilage that cushions the ends of your bones wears down over time. Although osteoarthritis can damage any joint, the disorder most commonly affects joints in your hands, knees, hips and spine.
