top new features, including Razor Pages, new and updated templates, and Application Insights integration. In this blog post we are going to dig into more details of features in 2.0. This list is not exhaustive or in any particular order, but highlights a number of interesting and important features.

ASP.NET Core 2.0 Features | ASP.NET Blog

Although it seems like magic (how did your settings get loaded!), ASP.NET Core 2.0 hides the adding of configuration settings behind `CreateDefaultBuilder()` method of `WebHost`, in `Program.cs`. `IConfiguration` is then added to the service container and is available in the rest of your application. We used this in `Startup` to add options.
