## **ASTM A500 / A500M - 20 Standard Specification for Cold ...**

ASTM A500 is a standard specification published by the ASTM for cold-formed welded and seamless carbon steel structural tubing in round, square, and rectangular shapes. It is commonly specified in the USA for hollow structural sections, but the more stringent CSA G40.21 is preferred in Canada. Another related standard is ASTM A501, which is a hot-formed version of this A500.

In 2013, however, an updated edition of the familiar ASTM A500 specification was also released (ASTM A500/A500M-13). This had two slight modifications: (i) Clause 5.1: The permitted processes to produce the steel were reduced to basic-oxygen and electric-furnace. Thus, the open-hearth process was removed, reflecting current practice.
