This is just one of the solutions for you to be successful. As understood, triumph does not suggest that you have fantastic points.

### Benefits Of Fsb Fluidized Sand Biofilters

Fluidized bed filters provide biological filtration very similar to that provided by under gravel filters. Nitrifying bacteria colonies grow on the surface of the particles of sand in the bed, and process ammonia and Nitrite into Nitrate as the water passes through the filter. Water needs to be pumped into the fluidized bed filter using a water pump. These aquarium filters usually do not come with an integral pump, so a separate water pump will need to be used.
