Case Studies Applying Educational Psychology

The Department of Psychological Sciences represents the combined strengths of the fields of psychology and communication sciences. We offer two undergraduate majors: Psychology and Communication Sciences, as well as two minors: Psychology and Communication for Health Professionals. Students can tailor their experience to meet their own career and educational goals.

homepage - Department of Psychological Sciences

Educational psychology is the branch of psychology concerned with the scientific study of human learning. The study of learning processes, from both cognitive and behavioral perspectives, allows researchers to understand individual differences in intelligence, cognitive development, affect, motivation, self-regulation, and self-concept, as well as their role in learning.

Educational psychology - Wikipedia

The case studies in the appendices are very conveniently located at the end for easy access in case the chapters are assigned in isolation. Interface rating: 4 Although the indentation in the tables could be improved and some images could be formatted to be more visually appealing, the interface in general is appropriate.

History. Learn more about the subject of history, which is broadly defined as the study of past events. Due to the broad nature of the concept, most historians narrow their scope by focusing on a particular time period, a particular country or region, a particular person, group, or individual person, a particular theme, or any combination of those categories.

Subject Matter | Educational Content Exploration

The field of psychology commonly uses experimental methods in what is known as experimental psychology. Researchers design experiments to test specific hypotheses (the deductive approach), or to evaluate functional relationships (the inductive approach).. The method of experimentation involves an experimenter changing some influence—the independent variable(IV)— on the research subjects ...
