Turn in the slave piston adjusting screw (Auto- Lash®) until slave piston and feeler gauge contact the rocker arm and the valve springs start to compress. Turn in the adjusting screw one additional turn. Wait 30 seconds for oil to be purged from the adjusting screw.

INSTALLATION - Engine Braking Technology and Solutions

The original CAT 3306 is similar to the CAT 3406 except it only has 2 valves per cylinder vs. the 4 with the 3406. All new CAT 3306DI engines have 4 valves per cylinder. The original indirect injection engines average 8 - 11 gallons of diesel fuel per hour but modern direct injection CAT 3306s average much better GPH ratings.
