Compiler Construction: Principles and Practice Kenneth C ...

In computing, a compiler is a computer program that translates computer code written in one programming language (the source language) into another language (the target language). The name "compiler" is primarily used for programs that translate source code from a high-level programming language to a lower level language (e.g., assembly language, object code, or machine code) to create an ...

Compiler - Wikipedia

compiler, we felt that emphasis on proofs could be misplaced. Many excellent theoretical texts already exist; our concern is reduction to practice. A compiler design is carried out in the context of a particular language/machine pair. Although the principles of compiler construction are largely independent of this context, the detailed ...
