Guide

The beauty and natural wealth of the Crown make it a global treasure. The Crown enfolds over 10-million acres of some of the most intact wildland on the entire continent. All the plants and animals seen here during the expedition of Lewis and Clark still survive here. It is essential home range for wildlife and a key intersection connecting vital habitat in Glacier National Park, the Bob Marshall and the Salmon-Selway wilderness areas.

Crown Of The Continent - The Nature Conservancy

Named by National Geographic, the “Crown of the Continent” is the twenty-first century name for the 73,000-square-kilometre ecosystem that spans the southwest corner of Alberta, the southeast corner of British Columbia and northern Montana.

...

The Crown of the Continent features many cherished outdoor recreation spots, but growing communities have increased pressure on them and nearby wildlands. Tens of thousands of acres of wilderness and land providing access to outdoor recreation spots need protection. The Blackfoot Clearwater Stewardship Project would expand the Bob Marshall Wilderness Complex while protecting and improving access for snowmobiling, mountain biking and other outdoor recreation.
