engines logging over 1 million miles, it's no wonder that many of these engines are still running today.

However, the key to longevity is proper care, maintenance and especially parts. These include the N14, which was gradually phased out and replaced with the Cummins ISX and QSX models.

The Cummins QSM11 Marine Engine Story
Time for some QSM11 education. As you read thru the below, always associate or think this— It's 20 HP per gallon per hour —example = burn 17.5 GPH = 350 HP that is being asked from the engine - and that is not RPM dependent. So at a full load of 580 HP, the engine would burn about 29-30 GPH.
