Data Communication
and Computer Network

1 A system of interconnected computers and computerized peripherals such as printers is called computer network. This interconnection among computers facilitates information sharing among them.

Computers may connect to each other by either wired or

Access PDF Data Communication And Networking

wireless media.

Classification of
Computer Networks

Data Communication and Computer Network

These technologies include telecommunications, computer networking and radio/satellite communication. Data communication usually requires existence of a transportation or communication

medium between the nodes wanting to communicate with each other, such as copper wire, fiber optic cables or wireless signals.

What is Data Communications (DC)? - Definition from Techopedia

by Dinesh Thakur

Category:

Communication

Networks Data

communication refers

Acces PDF Data Communication

And Networking

to the exchange of data between a source and a receiver via form of transmission media such as a wire cable.

Data communication is said to be local if communicating devices are in the same building or a similarly restricted geographical area.

Data Communication - What is Data Communication?

Data communications

Acces PDF Data Communication And Networking

refers to the transmission of this digital data between two or more computers and a computer network or data network is a telecommunications network that allows computers to exchange data. The physical connection between networked computing devices is established using either cable media or wireless media.

Acces PDF Data Communication And Networking

Networking and Communication

Data Communication mainly consists of different transmission methodologies and computer networking is one of them. Computer networking is used to transfer both digital and electronical data to communicate that information across different geographies and mediums.
