Education and social reality: present and future.
Hargreaves (1982) has argued that the education system encourages individualism and competition rather than social solidarity and shared values. Educational norms discourage collaborative learning (instead seeing it as cheating or copying) and instead encourages individuals to try and beat each other: the opposite of social solidarity.

Social reality is distinct from biological reality or individual cognitive reality, representing as it does a phenomenological level created through social interaction and thereby transcending individual motives and actions. The product of human dialogue, social reality may be considered as consisting of the accepted social tenets of a community, involving thereby relatively stable laws and ...

Social reality - Wikipedia

In social psychologist Kenneth Gergen's 1991 book, *The Saturated Self*, he warned of an Orwellian world where technology might saturate human beings to the point of "multiphrenia," a fragmented version of the self that is pulled in so many directions the individual would be lost. "I am linked, therefore I am," he famously said, playing on Descartes' "I think, therefore I am."
