(a) An emergency lighting system, independent of the main lighting system, must be installed. However, the sources of general cabin illumination may be common to both the emergency and the main lighting systems if the power supply to the emergency lighting system is independent of the power supply to the main lighting system.

## **14 CFR § 25.812 - Emergency lighting. | CFR | US Law | LII ...**

Lighting Design Layers. Most lighting designers think in terms of three main lighting categories: 1. General or Ambient Lighting. These are called “general” or “ambient” because they are simply used to make an interior space visible. They provide general lighting for a space and are sometimes used to refer to natural, or existing light.
