Endocrine System (Theory) : Rodent Anatomy : Biotechnology ...

The command center for the endocrine system is the hypothalamus, a small, penny-sized portion of the brain. The hypothalamus acts as an endocrine organ that secretes oxytocin and anti-diuretic hormone (ADH, also known as vasopressin). These hormones travel down the pituitary stalk to the posterior pituitary gland where they are released directly into the

Endocrine System Virtual Lab - newpathonline.com

Together with the nervous system, the endocrine system controls and regulates many internal bodily functions. While the nervous system uses nerve impulses as a means of control, the endocrine system uses chemical messenger molecules called hormones. Hormones are produced, stored, and secreted by the network of glands.
