EPIC - User's Guide
Wash any excess brake fluid drops from the caliper and master cylinder with a wet cloth. Step 17. With the pad spacer still in position pump the brake lever until it feels firm. If the brake lever does not feel firm or the lever pulls back too far, repeat the bleeding procedure as above to remove any remaining air from within the brake system.

How to Bleed Quad Disc Brakes | Epic Bleed Solutions
6) bike moves up and down and then air stops. This takes about 1-2 seconds and I release the valve 7) dismount and tight autosag valve. 8) move brain back to fully firm position. 9) ride and not worry about it. From time to time I will check on travel usage and for the most part am 95% of the way to seam with the o-ring.

What makes a cross country mountain bike fast? Is it carbon and digital everything, or is it the perfect geometry, suspension, and attention to detail? Given the choice, we'll take the latter. That's why we constructed the Epic Comp from our lightweight, stiff, and reliable M5 aluminum, while the geo follows our XC 29 Geometry for explosive power, incredible speeds, and nimble handling.

Epic Comp 29 | Specialized.com
With both syringes held upright, gently push on the plunger of the caliper syringe to inject brake fluid until there is 2-3mls left in the caliper syringe. You should see fluid and air bubbles enter the lever syringe. Do not inject all of the fluid in the syringe, otherwise air may be reintroduced into the brake system.

With the brake lever depressed, open and close the bleed nipple in rapid succession (for approximately 0.5 seconds each time) to release any air bubbles which may still remain in the caliper. Repeat this process 2-3 times. Then, whilst still holding the brake lever to the bar, tighten the bleed nipple to 4-6Nm (35-53 in.lbs).

Overview | Features & Benefits The CCB II computer controlled brake is a microcomputer network-based system that provides faster response for full automatic and independent brake control on freight and passenger locomotives. Railroad data proves that CCB II is the industry's most reliable air brake. CCB II features advanced self-diagnostics – seven processors continuously monitor [...]

CCB II - NYAB Products - NYAB Products
As the brake pipe pressure reduces, the service portion on each car divert air from their reservoirs to their brake cylinders. To release the brakes, the engineer charges the brake pipe. This method of controlling the brakes on freight and passenger cars has been virtually the same since its invention by George Westinghouse in 1868.
