Water Conservation Resources For Kids | Water Use It Wisely

The children experiment by adding water into the tube with a baster, a squirt bottle, and a funnel. They observe carefully, comparing how far each tool moves the water. This class of 4-year-olds has been working with these materials for a few weeks, using forces—air pressure, water pressure, and gravity—to move water down, up, and sideways.

Excerpt from Spotlight on Young Children: Exploring ...

Young children enjoy exploring, but are not able to assess what is safe and what is not. Children need to be protected against potential danger. Be especially cautious when they are around water, climbing, and even when they approach pets that are unknown to them. Exploring safety will be covered more in the next section.
