critical dialogue regarding what constitutes family nursing prevents the further development of the specialty area of family nursing. In this essay, the author issues nine challenges faced by those who would contribute to the development of family nursing. PMID: 2022384

Family nursing research, theory and practice.

Family nursing is a part of the primary care provided to patients of all ages, ranging from infant to geriatric health. Nurses assess the health of the entire family to identify health problems and risk factors, help develop interventions to address health concerns, and implement the interventions to improve the health of the individual and family.

Family Health Care Nursing: Theory, Practice, and Research ...

Three qualitative studies were conducted to explore the meanings, patterns, and day-to-day experience of family members staying with hospitalized relatives. The data were used to develop a theory of vigilance inductively with implications for further research, and provide a theoretical framework for nursing interventions.
