was interested in learning how characteristics are passed from parents to offspring. To study this he bred pea plants because they were easy to study. Genetics The field of biology that investigates how characteristics are transmitted from parents to offspring is called genetics.

## **Genetics and Heredity Completed notes**

Gregor Johann Mendel was a scientist, Augustinian friar and abbot of St. Thomas' Abbey in Brno, Margraviate of Moravia. Mendel was born in a German-speaking family in the Silesian part of the Austrian Empire and gained posthumous recognition as the founder of the modern science of genetics. Though farmers had known for millennia that crossbreeding of animals and plants could favor certain desirable traits, Mendel's pea plant experiments conducted between 1856 and 1863 established many of the rul
