# Read Online Human Population Growth Answer

exponential growth cannot continue indefinitely.

## **Human Population Growth | Boundless Biology**

Answers to Population Growth Assignment. 1. Contrast the implications for the population of the world.... Under Scenario 1,  $P = 1.75$ , so using the Rule of 70 (approximate doubling time formula),  $T_{\text{double}} \approx 70 / 1.75 = 40$  years. The exact formula is  $T_{\text{double}} = \log(2) / \log(1+r)$  and here  $r = 0.0175$ , so  $T_{\text{double}} = 39.95$  or about 40 years.

## **Answers to Population Growth Assignment**

Demographic transition theory suggests that population growth reaches 'modern equilibrium' (~0% growth rate of the population) in the post-industrial stage of economic development. What about...

## **Human Overpopulation Questions and Answers | Study.com**
