### earth science atmosphere hydrosphere Flashcards ... - Quizlet

The spheres are the four subsystems that make up the planet Earth. They are called spheres because they are round, just like the Earth. The four spheres are the geosphere (all the rock on Earth), hydrosphere (all the water on Earth), atmosphere (all the gases surrounding Earth), and biosphere (all the living things on Earth).

### Learn About Earth's Spheres! - Generation Genius

The Hydrosphere The hydrosphere is composed of all of the water on or near the planet's surface. This includes oceans, rivers, and lakes, as well as underground aquifers and the moisture in the atmosphere. Scientists estimate the total amount at about 1.3 billion cubic kilometers.

### What Are the 4 Spheres of the Earth?

While the atmosphere stores water molecules, moisture and water form in the hydrosphere. The hydrosphere includes all bodies of water on Earth, ranging from underground reservoirs and basins to streams, rivers, oceans and lakes. It also includes solid and gaseous water, such as ice and water in volcanoes and hot springs.
