### Activity: Bird Beak Adaptation Lab

Some of these characteristics have traditionally been explained as adaptations to flight, but if the characteristics first appeared in dinosaurs long before the evolution of flight, then they weren't adaptations to flying. This lab is about living birds, not extinct dinosaurs, so I will describe just two of the unusual features that birds inherited from their dinosaur ancestors: feathers and pneumatic bones.

### Bird Skeletons - Brian McCauley

Desert Birds: A desert is a barren landscape area with a little to no water (no precipitation) is found which makes the living condition extremely hostile for plants and animals..
