Front Page - Financial Market ASSOCIATES

A financial market is a market in which people trade financial securities and derivatives at low transaction costs. Some of the securities include stocks and bonds, raw materials and precious metals, which are known in the financial markets as commodities. The term "market" is sometimes used for what are more strictly exchanges, organizations that facilitate the trade in financial securities, e ...

Financial market - Wikipedia

Functions of Financial Markets . Financial markets create an open and regulated system for companies to acquire large amounts of capital. This is done through the stock and bond markets. Markets also allow these businesses to offset risk. They do this with commodities, foreign exchange futures contracts, and other derivatives.
