Specifically, the paper seeks to understand the role, if any, of indigenous knowledge in food production and food security. A mixed methods approach comprised unstructured face-to-face interviews, and a survey questionnaire was used to gather data on indigenous knowledge and its role in food production processes and food security.

To indigenous people,
food is not only a
product but a process.

Where To Download

We must work to ensure that the world benefits from Indigenous knowledge, wisdom, and values. Food as a process underpins the concept of “food systems”, which involves an acknowledgement of the networks of land, labour and livelihoods that underpin diets, health and development.

Indigenous African Knowledge Production Food Processing Practices Among Rural Women

The indigenous knowledge associated with African vegetables and their importance for the food security of many rural South Africans warrants further discussion. This is especially in light of food security activities emphasising food production and improved access to food in a country and region which is faced
