## **Isotonic Solution Definition Biology**

An isotonic solution is one that has the same osmolarity, or solute concentration, as another solution. If these two solutions are separated by a semipermeable membrane, water will flow in equal parts out of each solution and into the other. The effect is zero water flow between the two

solutions, although water is moving both ways.

## **Isotonic Solution - Definition and Examples | Biology**

...

Isotonic is a solution consisting of a similar salt concentration as the cells and the blood. We use it commonly as intravenously infused fluids for patients. It is a solution where two solutions that are

## **\* Isotonic (Biology) - Definition - Online Encyclopedia**

A solution is isotonic when its effective osmole concentration is the same as that of another solution. In biology, the solutions on either side of a cell membrane are isotonic if the concentration of solutes outside the cell is equal to the concentration of

# Download Ebook Isotonic Solution Definition Biology

solute inside the cell.

## **Tonicity - Wikipedia**

There are three types of solutions determined based on tonicity: (1) hypotonic solution, (2) hypertonic solution, and (3) isotonic solution. In hypotonic solution, the osmotic pressure is lower than the solution being compared to. The solutes in a hypotonic solution are also less (in concentration) than

# Download Ebook Isotonic Solution Definition, Biology

another solution.

## **Hypotonic solution Definition and Examples - Biology**

...

An isotonic solution is a solution wherein the amount of solutes is basically the same as the number of solutes of another solution. For instance, a cell that is isotonic to the outside solution means that both the cell's intracellular fluid and

# Download Ebook Isotonic Solution Definition Biology

the surrounding fluid will have equal osmotic pressure and the same water potential.
