JOINTS OF THE UPPER EXTREMITY. Types

File Type PDF Joints Of The Upper Extremities Anatomical Chart

of Joints: Joints are structures that connects bones together. Fibrous Joints: Collagen joints. Suture of the skull. The interosseus membrane between the radius and ulna. This is a type of syndesmosis-- i.e. a sheet of fibrous tissue.

Anatomy: The Upper Extremity

File Type PDF Joints Of The Upper Extremities Anatomical Chart

In the upper limb, sprains are more common in the elbow and shoulder regions than at other sites. The most common aetiological factor associated with acute sprains at both the shoulder and elbow joints is a fall on an outstretched hand (FOOSH). At the glenohumeral joint, this injury can result in a tear of the glenoid labrum known as
