Nighttime landscape photography might mean using different techniques. Keep moving objects, like the stars, still in relation to the scenery is only one you can use. Light is the biggest challenge to overcome. So you should focus on dealing with low light conditions.

The Ultimate Guide to Landscape Photography (85 Best Tips!)

Again, oftentimes in landscape photography, you are trying to capture a scene rather than a solitary thing. Many times, the scene you are trying to capture is far away from you. Most lenses have a range of focus values, and once you get beyond a certain distance (often 20-30 feet, or 8-10 meters) the focus is set at infinity.

5 Tips for Setting the Focus in Your Landscape Photography

Most landscape photography relies on wide-angle lenses and a large depth of field to adequately capture the subject. A high aperture, adjusted with the f-stop, allows most of the subject to come into sharp focus. Use the gridlines in your viewfinder or screen to find focus.

A Complete Guide to Landscape Photography - 2020 - MasterClass

Maximize the depth of field. Choosing your depth of field is an important part of capturing stunning landscapes. Landscape photos usually require the vast majority of the photo to be sharp (the foreground and background) so you need a deeper depth of field than if you are taking a portrait of someone.
