The NWT Battery Relocation Tray is intended for engine swaps in 84-95 Trucks and 4Runners, when the battery is re-located to the LH side of the engine bay. It is designed to fit in the fender area just behind the headlight and coolant over-flow tank. This will provide a safe surface for mounting the battery.

In car tuning culture, an engine swap is the process of removing a car's original engine and replacing it with another. This may be a like-for-like replacement, or to install a non-factory specification engine. Typically an engine swap is performed for performance, swapping-in a more powerful engine; however, an engine swap may also be performed for
