Grasping orality allows a better understanding of human nature, not only by offering a glimpse of what primitive society's thoughts might be, but by putting the evolution of thoughts in a new light. Differences in today's societies often reflect their degree of literacy, i.e., the maturity of their written thought process.

Like all technologies, literacy has the potential to deepen our appreciation of the world and ourselves. But it also has the potential to alienate us from lived reality. While homo sapiens started speaking language as long as 60,000 years ago, it only began writing down its speech within the past three or four thousand years of its history.

### Orality and Literacy: The Technologizing of the Word by ...

In Walter Ong's Orality and Literacy, he noted the differences between literate and illiterate cultures. Ong emphasized speech being the primary and more vital language used as opposed to written texts. Although speech is still prominent over writing, this current "high technology" age gives writing more weight on a scale of importance.

### Orality vs. Literacy - New Plains Student Publishing

Generally, "literacy" is understood as the ability to read and write, while "orality" describes the primary verbal medium employed by cultures with little or no exposure to writing. A "great divide" is sometimes posited between them, assigning to each certain cognitive, social, and cultural characteristics.

### Orality and Literacy - Biblical Studies - Oxford ...

Orality and Literacy 'Professor Walter Ong's book explores some of the profound changes in our thought processes, personality and social structures which are the result, at various stages of our history, of the development of speech, writing and print. And he projects his analysis further into the age of mass electronic communications

### Orality and Literacy - Monoskop

Literacy and Orality. by Jason Barney, Latin Teacher. In our previous post, "Literacy and Society", we began to argue that we should think of literacy more as a continuum, admitting of perpetual improvement, than simply a skill to be mastered in the early years of school. While functional literacy may be at 99% in the United States (and many 1stworld countries), we suspect that the majority still would not claim to be highly literate or well-read.

Though disputed, all sides agree that orality is the predominant mode of communication in the world and that literacy is a relatively recent technological development in human history. Pieter J.J. Botha Orality as a condition exists by virtue of communication that is not dependent on modern media processes and techniques. It is negatively formed by the lack of technology and positively created by specific forms of education and cultural activities. . . .

### **Orality (Communication) - Definition and Examples**

Orality is thought and verbal expression in societies where the technologies of literacy are unfamiliar to most of the population. The study of orality is closely allied to the study of oral tradition. The term "orality" has been used in a variety of ways, often to describe, in a generalised fashion, the structures of consciousness found in cultures that do not employ, or employ minimally, the technologies of writing. Walter J. Ong's work was foundational for the study of orality, and ...

Orality and Literacy (1982) In Ong's most widely known work, Orality and Literacy: The Technologizing of the Word (1982), he attempts to identify the distinguishing characteristics of orality by examining thought and its verbal expression in societies where the technologies of literacy (especially writing and print) are unfamiliar to most of the population.

### **Walter J. Ong - Wikipedia**

Part of the impetus to rethink the literacy/orality model is that the technological advances of recent years - particularly in the realm of cyberspace - have created a world where the distinction between the two media becomes blurred.

### **Orality and Literacy | Taylor & Francis Group**

As Walter Ong observes in Orality and Literacy, the way we communicate — whether it be through voice, writing, or print — changes how we think and behave. "Writing, in the strict sense of the word, the technology which has shaped and powered the intellectual activity of modern man, was a very late development in human history.
