What Animals Live in Groups? - WorldAtlas

After living with Mongolian herding families, Dr Fijn has observed through firsthand experience both sides of the human-animal relationship. Examining their reciprocal social behavior and communication with one another, she demonstrates how herd animals influence Mongolian herders' lives and how the animals themselves are active partners in the ...

Living with Herds by Natasha Fijn - Cambridge Core

Goats, sheep, and llamas, for instance, live in herds as a form of protection. They move from one fertile grassland to another without an organized direction. Predator s such as lions, wolves, and coyotes pose major risks to domestic herds. Herder s have traditionally provided protection for the animals.

Living with Herds af Natasha Fijn som e-bog, pdf hos tales.dk

Many animals naturally live and travel together in groups called herds. Goats, sheep, and llamas, for instance, live in herds as a form of protection. They move from one fertile grassland to another without an organized direction. Predators such as lions, wolves, and coyotes pose major risks to domestic herds.
