MACK EA7-470 dismantling - tradetrucks.com.au
The Mack e7 engine's optimal running rate is at 1400-1800 rpms but isn't designed for high running rates. It is not unlikely to have a Mack Engine put 1,500,000 miles hauling full loads and not need a major overhaul. Mack E7 engines are found in mining, oil and gas, agriculture, construction, pumps and compressors and power generation.

Mack E-7 History and Technical Information - Capital Reman ...
The E7 engine was first produced by Mack in 1988. It is a heavy-duty, inline six-cylinder, diesel engine that saw use primarily in commercial 18-wheel trucks. The engine underwent some modifications over the years and was in production from the late 1980s into the 21st century.
