## Ursula K. Le Guin — Malafrena

Malafrena is a 1979 novel by Ursula K. Le Guin. The only fantastic element of this novel is that it takes place in the imaginary Central European country of Orsinia, which is also the setting of her collection Orsinian Tales . In many ways, Malafrena reads like a 19th-century novel, with its many detailed characters, its political and romantic subplots, its lack of the supernatural, and its settings that range from the mansions of the aristocracy to slums and a prison.

in a career spanning half a century, Ursula K. Le Guin has produced a body of work that testifies to her abiding faith in the power and art of words. She is perhaps best known for imagining future intergalactic worlds in brilliant books that challenge our ideas of what is natural and inevitable in human relations—and that celebrate courage, endurance, risk-taking, and above all, freedom in the face of the psychological and social forces that lead to authoritarianism and fanaticism. it is ...
