The first step to have the next generation come back to the farm or ranch is to get them there. The next step is to keep them there. This requires thought about how to transfer management and ownership of the operation over a period of time. Four phases of transfer have been identified and are discussed in this article.

Building the next generation of autonomous robots, Singh says, will take integrating components like robotic arms. One of Singh's most recent scientific cruises took him to the Arctic. In Greenland's Sermilik Fjord, one of his robots rendered sharp 3D maps of melting icebergs—something that is currently difficult to do with autonomous robots.
