### Mechanical Fuel Pumps | JEGS

When the mechanical fuel pump leaks oil from a silicone gasket, the cause can often be traced back to improperly tightened pump mounting bolts. The fuel pump bolt torque specification is usually around 25 to 35 foot-pounds. Regardless of the model of the fuel pump, the best way to ensure the bolt is tightened properly is to use a torque wrench.

### Amazon.com: diesel primer pump

Around 15-20 years ago, it was common for fuel injector pumps to process fuel in a system at around 10,000 to 15,000 psi (pounds per square inch). But that's only about half of what engines are expected to do today. Fast-forward to the present day, and those diesel fuel injector pumps are operating in the 30,000 to 40,000 psi range.

### Troubleshooting Diesel Engine Fuel Injection Pump Problems

Check the fuel pump fuse. Often, it's not the pump itself that fails to function, but the power that supplies it. Check in your owner's manual for the location of the fuse box, then find the fuse that corresponds to the fuel pump. Pull it out and inspect it for signs of failure. If the fuse is blown, it will be broken or burned.
