Marine scientific research is internationally regulated by the 1982 United Nations Convention on the Law of the Sea (UNCLOS). Coined the "constitution for the oceans," [3], the UNCLOS sets out States' rights and obligations in the world's oceans.

The law of the sea and current practices of marine ...

At the same time, marine scientific research has taken on a broader meaning; it is not only the marine environment itself which is under investigation, but also the complex interaction of the ocean and the global environment (...) Increasingly, we will look to the oceans to answer questions and find solutions to problems generated on land.

Marine scientific research in Pacific Small Island ...

This scientific paper, by KSLOF scientists Alex Dempsey and Sam Purkis, shows how they used data-based methods to develop the first comprehensive oceanic and marine bioregions for the South Pacific. These marine bioregions enable the design of ecologically representative national marine protected areas in Pacific nations.
