MGB Specification : How-To Library : The MG Experience

All MGBs (except the V8 version) utilized the BMC B-Series engine. This engine was essentially an enlarged version of that used in the MGA with displacement being increased from 1622 cc to 1798 cc. The roadster was the first of the MGB range to be produced. The body was a pure two-seater but a small rear seat was a rare option at one point.

Tech Tips: MGB - Chicagoland MG Club

While the engine was still on the engine stand after reassembly I topped it up with oil and proceeded to rotate the innards with the MGA hand crank. After fewer than 20 turns of the crank (10 turns of the oil pump) oil came pouring out of the port at the right rear corner of the block. After installation in the vehicle I pre-filled and ...

However, to deal particularly with the MGB 1800 engine, the oil pump fitted to these motors is so under-stressed and over capacity that most of the oil it pumps is going to waste via the pressure relief valve. After extended mileage the plunger and spring may be excessively worn on the diametrical faces and cause fluctuating oil pressure at low ...

On my modified 1275 Austin engine, I used the OEM vented style oil cap and ran a hose from the separator on the timing cover to the front of the K&N air filter - this gave acceptable air flow and was probably the very minimum acceptable. A larger air breather on the valve cover would have been better.
