Maintaining MIG (GMAW) Welders Unlike stick welders, wire welders (MIG and/or flux-cored welding) include many more peripheral items - including the gun liner, gun contact tips and the shielding gas hose - and therefore require much more regular care and attention. Again, always unplug the machine before performing any maintenance tasks.

### Welder Maintenance | Lincoln Electric

A welding machine is a device used to fuse pieces of metal together, literally melding two pieces into one. Welding machines vary in size, power and electrical output capacities from small, home-use welders to heavy industrial machines. There are different parts for each welding machine depending on the application of the individual tool.
