includes any potential for adapting the activity in order to allow for change in the client. This is called 'grading'. Grading allows the client to progress from exploration, through acquisition of skills, to attainment of goals. It also allows him to move on to the next stage once a skill has been learned.

Activity analysis is essential in selecting an activity with those characteristics which are the most appropriate for treatment of the client. Occupational therapists learn about activity analysis in their educational program; however, the literature is not clear on how therapists use activity analysis in
