New Frontiers in Contraceptive Discovery

The program seeks to foster concepts for contraceptive discovery platforms that can contribute to the development of new methods suitable for women and men living in limited resource settings. In its request for proposals, the program noted its desire for science aimed at developing new methods for long-term regular use in the form of injectables, implants, or regular oral contraception.

Contraceptive Research: Science Heads to New Frontiers ...

Introduction. Although oral contraceptives (OCs) have been regarded as one of the best studied drugs in the history of medicine, remarkably little is known about the psychological and behavioral consequences of OC use (Montoya and Bos, 2017). Given that more than 100 million women worldwide use OCs for birth control (Christin-Maitre, 2013), studies investigating the effects of OCs on emotion ...
