Occupational Therapy and Physical Therapy: What's the ...

Physical and occupational therapists can help workers recover much faster than if they were just resting on their own - leading to fewer lost working hours.

Therapy can also reduce the need for specialist treatment and other services, resulting in reduced overall cost and better long-term management.

The Difference Between Occupational and Physical Therapy

Some people believe, wrongfully, that occupational therapy is just physical therapy that is related to your job and

Download Free Occupational And Physical Therapy

going back to work after an injury or surgery. Though the confusion is understandable, this 'type' of rehabilitation is technically worker's compensation or work conditioning/hardening, both of which PTs and OTs can perform.

Occupational Therapy Vs Physical Therapy | Difference ...

There is one main difference between occupational therapy and physical therapy: Occupational therapy is used to help or regain patients' ability to perform day-to-day tasks on their own, and physical therapy is used to improve patients' ability to move their bodies and manage their pain.

Physical Therapy vs Occupational Therapy | University of ...

Occupational and physical therapists both provide necessary interventions to help individuals gain or regain skills, improve independence, use assistive devices, and/or modify their
