Oracle E-Business Suite Flexfields Guide

What is the distinction between flexfields and application features? Flexfields, while they are a major feature of the Oracle E-Business Suite as a whole, are merely a mechanism to provide many application features. Key flexfields provide a flexible way for the Oracle E-Business Suite to represent objects such as accounting codes, part numbers, job descriptions, and more. For example, the Accounting Flexfield is a feature that uses a key flexfield to represent accounting codes throughout ...

Oracle Financials Cloud Release 12

Oracle Sales Cloud does not use flexfields, but instead uses Application Composer to extend the data model in much the same way, adding new custom fields to business objects. Flexfield Data . Flexfield data values are stored as segments and each flexfield can be made up of one or more concatenated segments. This segment data itself can be found in the exact same tables as the business object data, in columns with names that begin with ATTRIBUTE.
