Oracle Real Application Testing - Solution to Test Oracle ...

Oracle Real Application Clusters (RAC) allow customers to run a single Oracle Database across multiple servers in order to maximize availability and enable horizontal scalability, while accessing shared storage. User sessions connecting to Oracle RAC instances can failover and safely replay changes during outages, without any changes to end user applications, hiding the impact of the outages from end users.

Real Applications Clusters | Oracle

new Real Application Testing capabilities in the Oracle Database 11g, database administrators can adapt to changes easily while keeping their undesired effects to a minimum. Real Application Testing helps organizations lower their testing costs by giving DBAs and system administrators an easy-to-deploy solution for testing

Oracle Database 11g Real Application Testing Overview

The advantage of Oracle RAC is that resources on both nodes are used by the database, and each node uses its own memory and CPU. Information is shared between nodes through the interconnect—the virtual private network. Real Application Clusters provide high availability because of the failover of connections in the event of a hardware failure or server connection failure.

Real Application Clusters (RAC) | Oracle RAC DBA Tutorial ...

Oracle Real User Experience Insight (RUEI) uses state-of-the-art technology for data collection, which does not require any modification, changes, or instrumentation of the applications monitored. Its passive monitoring approach allows enterprises to deploy in production, without requiring costly test/QA environment validations.

Oracle Real User Experience Insight 11g Datasheet

Oracle Data base 11g places considerable emphasis on the pro active testing of changes by making change assurance one of the cornerstones of the new release.It does this through the Real Application Testing feature;this feature encompasses two components,Data base Replay and the SQL Performance Analyzer,that dramati cally reduce the risks inherent in adopting changes by offering you a realistic method of testing changes using real-life work loads.
