Objective Structured Clinical Examination (OSCEs) is a form of performance-based testing used to measure candidates' clinical competence. During an OSCE , candidates are observed and evaluated as they go through a series of stations in which they interview, examine and treat standardized patients (SP) who present with some type of medical problem.

What is Objective Structured Clinical Examination, OSCEs?

Sample OSCE stations The exam will consist of ten OSCE stations, each of which will have the individual scenarios placed outside. The scenarios will contain information about the "patient" you will see at that particular station. The information you will be given will include the patient's name, age, gender,
