Plant Diversity - Journal - KeAi

where a is the rate of resource mineralization and Q the coefficient of resource conversion into biomass (23, 24). If no species is present, the equilibrium resource concentration (i.e., the effective R^*) is S , giving $B = 0$. The effect of diversity on total plant biomass depends on how diversity influences, on average, the R^* value of the best competitor present in a community.

Plant diversity and ecosystem productivity: Theoretical ...

This unit is designed to be used with Fast Plants, a type of plant that has been bred to have a very short life cycle. Fast Plants will produce harvestable seeds approximately 40 days after planting. The unit allows students to investigate germination, growth, pollination, and seed production.

plant diversity seed plants Flashcards and Study Sets ...

1. Introduction. The conservation of plant diversity has received considerably less attention than the conservation of animals, perhaps because

plants lack the popular appeal of many animal groups (Goettsch et al., 2015).As a result, plant conservation is greatly under-resourced in comparison with animal conservation (Havens et al., 2014).Yet plants are much more important to us.
