BeagleBoard.org - getting-started

There are multiple ways to run initial software on your board, but it is likley that the simplest way to get an update is to create an exact replica of a bootable microSD card and boot off of it. The BeagleBone Black Rev C has 4GB of eMMC storage that can be initialized by a program booted off of a microSD card.

BeagleBoard.org - bone101

Connect your BeagleBone Black using the USB cable to your Laptop or PC. This is the simplest method to get your BeagleBone Black up and running. Once you connect your BeagleBone Black, it will start to boot using the operating system on the eMMC storage.
