The process from the factory costs \$2,000 for an Evo engine and \$2,200 for a black and chrome job. Your dealer will probably also charge you for R&R.; Twin Cams are slightly higher, but there's more options. You can ship your Twin Cam engine and the factory will install a big bore kit and reman your engine at the same time.

Remanufacturing Evolutions By Harley-Davidson | Hot Bike

The Evolution engine is an air-cooled, 45-degree, V-twin engine manufactured from 1984 by Harley-Davidson for the company's motorcycles. It was made in the 1,340 cc displacement for Harley-Davidson Big V-twins bikes, replacing the Shovelhead engine until 2000 when the last EVO was placed in a production factory custom FXR4. In 1999, it was replaced by the Harley-Davidson Twin Cam 88 in the Touring and Dyna model and in 2000 in

Harley-Davidson Evolution engine Disassembly and Re ...

A rebuilt engine involves removing the engine from the vehicle and completely disassembling it from what's commonly referred to as "carb to pan". This is an older description when engines had carburetors instead of fuel injection systems they have now, so today it would be referred to as "Injector to Pan," with the pan being the oil pan.
