Modern Evolutionary Classification

Section Review 18-2

1. Species are classified into the same genus because they are closely related; that is, they share a more recent common ancestry.
2. Instead of grouping organisms only according to physical similarities, evolutionary classification also considers evolutionary history.
3. Cladistic analysis considers only evolutionary history.

Ch. 18 Answer Key

Modern Evolutionary Classification ● In a sense, organisms determine who belongs to their species by choosing with whom
